Infrastructure as a Service

- Dedicated Network, Storage and Server resources
- On-premise or on the Eurapp™ private cloud platform

Websdepot is uniquely positioned to provide best of class private cloud services with our Eurapp™ application delivery platform with the highest level of availability and reliability for your applications. Regardless of your goal, we have the infrastructure, scalability and resources to take your business to the next level.

Founded in 2002, Websdepot Technology Partners is a next generation Managed IT Services Provider. Our expertise includes extensive desktop, server and network management, voice and email services, data center operations and enterprise wide implementations of virtualization technologies for everywhere and anytime application access.

Eurapp™ – scalable and highly available infrastructure Websdepot designed and fully manages as an on-demand pay per use service to extend your current office resources securely onto your dedicated application private cloud platform.

Eurapp™ VOICE – a fully managed unified communications solution for data and voice productivity that scales email and voicemail from a single office to multiple corporate locations seamlessly. Read. Listen. Be Heard.

Eurapp™ SYNC – a corporate data management solution for easy private collaboration that scales from simple online file sharing to dedicated file servers. Your Data. Your Way.

Eurapp™ CONNECT – a secure connectivity solution for proactive security and guaranteed uptime that scales from one to many internet links and fully managed local wired and wireless networks. You Connected. You Protected.

Websdepot has a long-standing track record of delivering IT projects of various sizes, from simple upgrades to major network design and implementation projects. Our clients trust us to deliver when delivery matters.
